EN – Key depository manual KB.G5

Opening and closing the depository:

Set the factory code on the dial (the factory code is “0000”).

Take out the shackle, press the opening button and the cover will open automatically.

Close the cover of the depository, slide the shackle in and turn the dial for not to be seen the opening code.

Setting your own number code:

Set on the dial the factory code “0000”.

Insert the key for change of the code to the hole on the side of the depository (picture n. 1). Always insert the key as deep as possible, until you hear the “click” sound.

Set your own number code (picture n. 2).

Take out the key for change of the code. The new code is set now.

Tip

Once you set up your own combination, turn only one of the numerical buttons back by one position and make sure, that the password is correct
